# Innovation is Science

**Pozitif R&D-Laboratory Pharma Company (PAL)** develop, manufacture and sell naturally-inspired and naturally-based nutraceutical and food supplement products for specific health needs.

All of PAL products are developed and supported by a clear scientific platform to deliver the impact and health solution for which they are designed.

PAL's nutraceutical and food supplement products are presented under four separate ranges, each with a different rationale, platform and market position.

The **PoziBiome™** range combines probiotic bacteria and synergistic nutrients to provide targeted health solutions through probiotic and natural supplementation.

PAL company has developed the **PoziBiome™** range under the brand name **Pozione Formulas™** on the latest research on probiotics and nutritional supplementation and incorporates industry-leading technology. Each **Pozione Formulas™** product contains Pozitif proprietary probiotic strains, manufactured 100% in-house, with proven stability and survivability in the GI tract.

**Pozione Formulas™** capsule products exclusively use vegan DRcaps™ to enhance the product's effectiveness. DRcaps™ are designed to delay the release of the probiotic bacteria, reducing their exposure to the acidic environment in the stomach and releasing them directly into the intestine where they are needed.

All probiotic strains used in the products were obtained as a result of R&D studies in PAL company.

PoziBiome™

A Complete Rang of Targeted Probiotic Solution

**Fem<sup>+30</sup>**

Probiotic bacteria especially formulated for women to support gut and digestive health.

### Reasons for Use:

Supporting intestinal digestion, protecting against intestinal diseases.

### Nutritional Information One capsule provides:

<b>Prebiotics</b>	<b>100 mg</b>
Inulin	
Fructooligosaccharide	
<b>Lactobacillus</b>	<b>4 billion CFU*</b>
<i>Lactobacillus rhamnosus</i>	
<i>Lactobacillus casei</i>	
<i>Lactobacillus acidophilus</i>	
<i>Lactobacillus plantarum</i>	
<b>Bifidobacteries</b>	<b>3 billion CFU*</b>
<i>Bifidobacterium lactis</i>	
<i>Bifidobacterium longum</i>	
<i>Bifidobacterium breve</i>	

\*CFU: Colony forming unit.  
Values may vary ±10% depending on analysis methods

### Directions:

Take 1 to 2 capsules daily morning or evening, with or after a meal. Do not exceed the recommended daily intake.

### Actual Capsule Size:

**PoziBiome™ Fem<sup>+30</sup>** is a formulation containing 7 different types of probiotics and prebiotics whose clinical studies have been completed. These are Lactobacillus species (*Lactobacillus rhamnosus*, *Lactobacillus casei*, *Lactobacillus acidophilus*, *Lactobacillus plantarum*) containing 4 billion CFU (colony forming unit) bacteria per capsule, and Bifidobacterium species (*Bifidobacterium lactis*, *Bifidobacterium longum*, *Bifidobacterium breve*) containing 3 billion CFU bacteria. It has been proven by different studies that the use of these strains, whose clinical studies have been completed, in addition to foods, increases nutrient digestion and absorption. It also increases the synthesis of folic acid and vitamins B2, B3, B6 and B12.

PoziBiome™

A Complete Rang of Targeted Probiotic Solution

## FreshGum<sup>Adults</sup>

Probiotic bacteria especially formulated for oral and upper respiratory health.

### Reasons for Use:

Oral health, Upper respiratory tract health, Halitosis.

### Nutritional Information One capsule provides:

Prebiotics	
Inulin	315.5 mg
Streptococcus	
Streptococcus salivarius K12	4 billion CFU*
Streptococcus salivarius M18	

\*CFU: Colony forming unit.  
Values may vary ±10% depending on analysis methods

### Directions:

One lozenge daily before bedtime, leave it in your mouth until completely dissolved.

Actual Lozenges Size:

PoziBiome™ FreshGum<sup>Adults</sup> is a formulation containing two different probiotics and prebiotics, clinical studies of which have been completed, created for the correction and improvement of oral health. These are *Streptococcus* (*Streptococcus salivarius* K12, *Streptococcus salivarius* M18) strains containing 4 billion CFU of bacteria per lozenge. Conducted clinical studies show that the use of these probiotic strains as a dietary supplement can prevent and cure problems such as pharyngitis, otitis media, tooth decay, gingivitis and halitosis.
